

Usage instructions PLANET EGGS

Egg Decorating Kit

• Liquid egg dyes:

Use warm and boiled eggs.

1. Separate each color with scissors.
2. Cut the tip of the desired color and pour it into a bowl.
3. Add 5 oz of hot water and 2-3 tablespoons of vinegar.
4. Bend the metal holder and dip the eggs one by one.
5. Remove the egg from the solution after obtaining the desired color and let it dry on the drying tray.

• Thermal stickers:

1. Choose medium sized eggs, boil them and leave them to cool. Separate the thermal stickers apart following the dotted line.
2. Place the egg into the thermal sticker so that the tips are seen equally from both ends.
3. Place the egg on a tablespoon or hold it with suitable tongs. Put the egg in boiling water. The egg is ready and tightly wrapped in the thermal sticker in 1-2 seconds.
4. If you want the egg ends to be colored dye the egg after putting the sticker on. Dry well and remove the dye left on the sticker. Thermal stickers are suitable for cracked eggs.

• Accessories:

Use the tape strips to stick the chosen accessory to the egg shell and create a character of your choice.

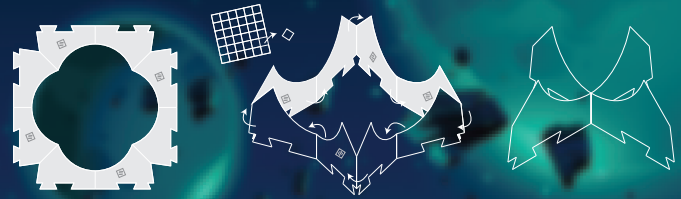

PUT A TAPE STRIP ON EACH INNER SIDE
AS SHOWN ON THE SCHEME

PUT A TAPE STRIP ON EACH INNER SIDE
AS SHOWN ON THE SCHEME

FOLD & STICK IT ON THE INNER SIDE

YOUR EGG STAND IS READY FOR USE!

• Egg stands:

Use scissors to cut the egg stands from the sides of the box and assemble them by inserting cutting 1 into cutting 2.

• Drying tray:

Punch out the pre-cut circles from the back of the box and use it as a drying tray.
